REPORT
OF
THE COMMITTEE OF VISITORS
OF THE
SURREY LUNATIC ASYLUM,
FOR THE YEAR, 1854,
PRESENTED AT THE
COURT OF QUARTER SESSIONS,
HELD AT REIGATE, on the 3rd Day of APRIL, 1855.

THE Committee of Visitors, in presenting their Thirteenth Annual Report, regret, that in consequence of the continued high price of provisions, and of articles of general consumption at the Asylum, a reduction in the weekly charge for the maintenance of patients cannot at present be contemplated.

There were in the Asylum on the 1st January, 1854, 871 patients; and, during the year, 329 additional patients were admitted, making a total of 1200, of whom, 67 males and 75 females were discharged cured; 15 males and

19 females were removed uncured ; and 59 males and 44 females died : leaving in the Asylum, at the close of the year, 921 patients ; of whom 396 were males and 525 females.

Of the patients discharged well, 59 were presented with donations from the Benevolent Fund, varying from five to forty shillings each.

Eight of the deaths during the year occurred under circumstances requiring Coroners' Inquests. The particulars of the verdicts are stated at length in the accompanying Reports of the Resident Medical Officers, no blame attaching to any Officer or Servant, except in one case, in which a poor patient received such injury as to occasion his death a short time afterwards, by being placed by another patient, through the culpable neglect of an attendant, in a bath much too hot.

This neglect could not be regarded as "wilful," and treated under the Statute as a Misdemeanour and punished accordingly. The Coroners' Jury also acquitted the Attendant of criminality in the case ; but the Committee considered it their duty to discharge the

Attendant under circumstances, which, it is trusted, will prevent his obtaining employment as an Attendant in any similar Establishment: and they have altered the taps in the bath rooms, so that should a patient obtain access there without the knowledge of any of the Officers, which he ought not to be able to do, he still will be unable to obtain hot water without the use of a loose key, which it is directed shall never be out of the possession of the Chief Attendant in each Ward.

The average number of patients attending Chapel was 407; and an average of 578 were daily employed in various trades—in labour on the farm or in the gardens; at needlework; or in the various domestic occupations of the Institution.

The additional buildings, directed by the Courts in January and July, 1853, to be erected, are now completed, whereby the Asylum is rendered capable of accommodating 430 male and 534 female patients; and arrangements have been made for providing suitable and beneficial occupation for all such of them as are capable of employment.

The Asylum is not susceptible of much (if any) further enlargement, except by the erection of new buildings; and notwithstanding the great extent of additional accommodation that has been provided during the last few years, it is still occasionally found insufficient for the requirements of the County. Several times during the year the Committee have been obliged to close the doors of the Asylum against the admission of patients, in consequence of there not being room for them. At one time male patients were alone excluded, at another time females, and sometimes both. This restriction on the admission of patients was increased by the obligation the Committee felt themselves under of keeping in reserve during the summer two parts of the Establishment as a provision for the treatment of Cholera, which, fortunately, never appeared in the Asylum; but the necessity for such restriction has occurred since the reservation for Cholera cases was discontinued in November last.

The mode of proceeding in such cases is as follows: the Overseers and Guardians of every Parish in the County are informed that the Asylum is full as to male patients, or females,

or both, as the case may be: and they are directed not to send any more such patients without receiving notice to do so; but they are requested to forward to the Clerk of the Asylum the name of every patient for whom they desire admission. The Clerk of the Asylum is directed to enter these names on a list, and as vacancies arise in the Asylum, he directs such patients to be sent, in the order in which their names have been forwarded to him. In this manner admission is obtained in time for all, and hitherto the list has been soon exhausted, and sufficient vacancies left in the Asylum to justify the removal of the restriction altogether, which, of course, has been done: but it is a great inconvenience to Parishes, during the continuance of such a restriction, to be obliged to remove their patients, first to private houses licensed for the reception of the insane, and thence to the Asylum.

This inconvenience is increased by the difficulty that exists of obtaining admission for pauper patients into private licensed houses; and so great was it in a recent instance, as to lead the Parish concerned to communicate with the Commissioners in Lunacy thereon.

This important subject requires immediate attention. By the Lunatic Asylums' Act, the Justices of every County are required to provide adequate accommodation for all the pauper lunatics thereof: and any one of Her Majesty's principal Secretaries of State is empowered, upon the Report of the Commissioners in Lunacy that the accommodation in any County is inadequate, to require the Justices of such County to cause an additional Asylum, or a new Asylum in lieu of an existing Asylum, to be provided; or the Committee or Committees of Visitors of an existing Asylum or Asylums forthwith to enlarge and improve the same in such manner as he may see fit.

By the 42nd section, every Committee of Visitors is empowered to contract with the Committee of Visitors of any other Asylum, or with the subscribers to any Hospital registered, or proprietor of any House licensed for the reception of Lunatics, for the reception into such Asylum, Hospital, or House, of the whole or of a portion of the pauper Lunatics of the County for which such first mentioned Committee is acting; but inasmuch as no such contract shall be made for a longer term than

five years, and may be determined at any time by any of the principal Secretaries of State, and shall not exempt the Justices of any County from the immediate duty and obligation of erecting and providing an Asylum or additional Asylum, or of enlarging or improving any Asylum in such manner as may be required, although the term for which such contract was entered into has not expired by effluxion of time ; it may be inferred that contracts of this kind were intended only for temporary purposes, and none such can be recommended for adoption in this County. Another arrangement has been suggested, namely, the removal to their Parishes of all those patients that are quite harmless and inoffensive, though still of unsound mind, of whom there are a considerable number in the Asylum. By the Statute none are to be sent to the Asylum except such as are *Lunatic and proper persons to be taken charge of and detained under care and treatment*. All are considered so on being sent, but it is probable that many, though remaining uncured, may pass whilst in the Asylum into a state in which they can no longer be regarded as such. It is very questionable whether Committees of Visitors can be justified in detaining patients of

this class, and at least there appears no reasonable objection to their discharge. Indeed, it is probable the Legislature fully contemplated such removals, when it empowered Committees of Visitors, or any three of them, to order the discharge of any patient, whether recovered or not ; and directed Overseers and Relieving Officers to remove such patients forthwith to their Parishes, or to Workhouses, on receiving notice to that effect, or forfeit for neglect or refusal therein any sum not exceeding ten pounds.

The Committee of Visitors have under consideration the adoption of the arrangement so suggested, and they recommend that no steps be taken for the provision of further accommodation for pauper Lunatics in this County until it has been tried.

There are many other important and interesting particulars in the management and condition of the Asylum to which the Committee of Visitors might be expected to advert in a Report of this kind, but as information respecting most of them is to be found in the Reports of the Resident Medical Officers that are

annexed, and in the usual elaborate statements of accounts and tables that are appended, the Committee prefer to confine their concluding remarks to a few points which they feel they ought not to pass over in silence.

The chief of these is the expression of their deep thanks to Almighty God for his great mercy in again preserving the Asylum from Cholera. Secondly, they rejoice to find that not a single patient has during the year been placed under mechanical restraint, and very few indeed in seclusion. No mechanical restraint has now been resorted to in the Asylum for several years, a circumstance which reflects much credit on the Medical Officers of the Establishment, and may be regarded as an additional proof how little this kind of coercion is required, under a judicious, vigilant, and humane system of treatment.

Thirdly: the Committee regret that they have during the year been deprived of the valuable services of their Chaplain, the Rev. JOHN BRIDGER, who has been appointed to labor in a more extended field of usefulness elsewhere. He has been succeeded by the

Rev. R. W. GREAVES, who, having frequently officiated for him, was well known and much appreciated in the Institution.

Lastly, the Committee have been desirous of increasing the usefulness of the Asylum as a Medical School, by extending to the Resident Medical Officers the privilege long enjoyed by the Visiting Physician, of taking pupils for the purpose of communicating to them instruction respecting the causes, the nature, and the treatment of Insanity. The regulations under which this permission is granted are as follows :—

- 1st. That pupils be admitted to witness the practice of the Asylum for periods of not less than three months each.
- 2nd. That the number of pupils do not exceed four at a time.
- 3rd. That not more than two go round the wards together ; and that they be not allowed on any occasion to be in the wards except in the presence of one of the Resident Medical Officers.
- 4th. That they be required to attend twice a week and not oftener ; and that they visit equally the wards for male and female

patients; the former in the company of the Resident Medical Officer for male patients, the latter in that of the Resident Medical Officer for female patients.

5th. That a fee of Two Guineas be required from each pupil for permission so to attend; such fee to be divided equally between the Resident Medical Officers.

6th. That the Resident Medical Officers be required not to sign any certificate for attendances which have not been in accordance with the foregoing regulations.

The Committee of Visitors feel assured no inconvenience can result from this arrangement, and they trust it may lead to much good, by extending the medical knowledge of a distressing malady, which has until recently been very little studied, and many of the peculiar features of which are yet not generally known.

TO THE COMMITTEE OF VISITORS,

Surrey County Lunatic Asylum,
30th December, 1854.

GENTLEMEN,

I beg to submit to you a statement of the progress and condition of the Asylum during the past year. The number of patients remaining in the Asylum on the 31st of December, 1853, was 376

Admitted since 161

Of whom have been discharged—

Recovered 67

Removed uncured 15

Died 59

Leaving in the Asylum 396

Coroner's Inquests have been held in five cases. In one case, the verdict of the jury was, "Natural death—apoplexy." In another case, "That the deceased died from scalds arising upon his being left in a hot-water bath in the temporary absence of the attendant. We, the jury, do not consider the fact of such absence amounts to an act of criminal neglect on the part of the attendant." In another case, "Natural death;" and in two other cases, "Natural death—epileptic fit."

The painful circumstances under which the lamentable accident above recorded occurred, induced the Committee to order that all the taps connected with the hot-water baths should be altered so as to prevent the possibility of a like occurrence.—The taps are now turned by a moveable

key, which is ordered never to be out of the possession of the attendant.

The deaths in the Asylum, although numerous, are fewer in number as compared with those of the preceding year. General paralysis, apoplexy, epilepsy, pulmonary disease, and debility, are always among the frequent causes of the mortality in all Asylums; but a principal cause by which the mortality at this Asylum is rendered so considerable, is to be found in the deplorable physical condition in which many of the patients are admitted—paralysed, helpless, and in the last stage of incurable disease—several of them have died within a few days after admission. It is much to be regretted that the parochial authorities do not more frequently hesitate before sending such cases to add to the mortality of the Asylum.

Upon the whole, the general health of the patients has been good throughout the year. Diarrhœa has prevailed to some slight extent; and during the latter part of September, and beginning of October, several cases of dysentery occurred, resulting in the deaths of six patients. This latter disease probably originated in some atmospheric influence—at least there was no other assignable cause. A temporary suspension of admissions of patients from those districts where cholera prevailed took place during the period of the epidemic; and it is to this, and other circumstances, such as strict attention paid to diet, cleanliness, ventilation, and drainage, which has confirmed me in the belief that the inmates of this Asylum have, under Divine Providence, entirely escaped from the disease.

The new ward for male patients was opened early in the autumn; it is most convenient and comfortable in every respect, and will accommodate 40 patients. It is fully

anticipated that this additional accommodation will be sufficient for the wants of the County for a considerable time to come, especially if some of the harmless and demented patients—and there are many such in this Asylum—were removed to Workhouses.

From my experience, during a connection of upwards of six years with this Asylum, I believe that regular and healthful occupation is a most powerful remedial agent in the successful treatment of the insane; and, entertaining these views, the employment of the patients has formed a leading feature in the management of the Institution, and, I am happy to say, with the most beneficial results. Spade husbandry has been increased during the year; and by the opening of the new workshops, which will take place in the course of a few days, an extension of employment will also be afforded to the artizans in the Establishment.

I am glad to be able to say that mechanical restraint is never employed in the Asylum; and that seclusion is rarely resorted to, except in some instances of acute mania, and then I consider it to be a very essential part of the treatment.

Several recoveries of a most gratifying nature have taken place; and I may here perhaps be permitted to call your attention to the case of P. Mc. L., admitted in February, 1849—length of time insane, 16 months. It was a case of dementia, resulting from an acute attack of mania, which had allowed the brain to pass into a state of complete inertness. He gave not the slightest indication of thought or feeling; he never even spoke; nor did he alter the position in which he was at any time placed: in fact, both body and mind seemed reduced to a mere vegetative existence. He remained in this state for upwards of two years after admis-

sion, about which time he began to show faint signs of returning intellect. By quiet and persevering attention, he was at length induced to dress himself; then to employ himself in the garden. Subsequently he was employed in the stables to look after a horse, an occupation in which he took the greatest delight and interest. He has continued steadily to improve, and is now convalescent, with his mind quite restored to health, and will be recommended at your next Meeting for discharge. The above is one of the most interesting and encouraging cases I ever witnessed; and tends to show that hope is not to be abandoned in any case, however unpromising and protracted.

In conclusion, I have much pleasure in being able to report, that the conduct of the officers and servants, as a body, has been marked by attention to their respective duties, and the Asylum in a most satisfactory condition.

I have the honor to remain,

Gentlemen,

Your obedient humble Servant,

CHARLES SNAPE.

Surrey County Asylum,
(Female Department.)

TO THE CHAIRMAN AND COMMITTEE OF VISITORS.

GENTLEMEN,

On the 31st of December last there were in the Asylum 495 female patients; during the year, 168 have been admitted; 75 have been discharged cured; 19 have been removed by their friends or respective parishes; and 44 have died: leaving in the Asylum this day (December 23), 525 female patients.

The deaths have resulted from the following causes:—

Paralysis	12
Epilepsy.....	4
Pulmonary disease	2
Disease of the heart	2
Diarrhœa	2
Erysipelas	2
Old age	5
Exhaustion, and various causes	15
	<hr/>
	44
	<hr/>

Three cases of sudden death occurred, upon which Coroner's Inquests were held.

In one case the verdict of the jury was "Natural death—from an epileptic fit;" in another case, "Natural death—from disease of the heart;" and in the third, "Natural death:" no neglect having taken place in any instance.

The general health of the patients has been exceedingly good; and we have again been favoured with an entire

exemption from epidemic cholera : the two cases of diarrhœa having taken place at distant intervals, and not during the presence of the epidemic.

It will be perceived that more than a quarter of the deaths have resulted from paralysis, which is unusual with insane females as compared with males.

That tranquillity which has been before reported has thoroughly prevailed throughout the past year : no patient has been under any species of restraint ; and seclusion has been requisite in the cases of three patients only, for a period of 33 hours in the whole.

Contrary to my calculations last year, and contrary to the previous ratio of admissions and discharges, the wards in the Asylum appropriated to female patients are at this time quite full ; and I see but little prospect of many vacancies occurring to supply the future wants of the County, and to secure the immediate admission of *recent* cases, which derive so much benefit from prompt and proper remedies.

In the Asylum, at this time, are a large number of that class of patients spoken of in my former report as being perfectly harmless both to themselves and others, although they are of unsound mind. They require the mere attention of an ordinary sick nurse, and might with entire safety be retained in their respective parish workhouses. During the past year the disposition of parish authorities to send us such persons as require some little extra care and attention has increased rather than diminished.

I beg to impress on the Committee the absolute power given them, in the recent Act of Parliament, to discharge any person detained in the Asylum, *cured* or *not* ; and this proper authority, being cautiously acted on from time to time, I think would give much accommodation, and enable

us to relieve many urgent cases ; for I am convinced it is only in an Asylum like this, properly constructed, having ample means, and conducted with liberality and watchfulness, that *recent* cases of insanity can be treated with full benefit to the sufferers, and with satisfaction to those whose duty it is to administer to their wants.

In that occasional leave of absence which you have granted me, and which is so requisite for all persons constantly residing in an Asylum for the Insane, I have availed myself of the opportunity of visiting other similar establishments. This comparison has enabled me to judge of our advantages and defects ; and in respect to the “Management of the Asylum,” I believe it is second to none—especially with regard to the cheerful and domestic character, both of the wards and its inmates.

I have every reason to be fully satisfied with the conduct of the officers and servants of the Institution ; and that everything is done that can be done to promote the cure and comfort of the patients under my care.

I beg to offer my thanks for the confidence reposed in me, which has always enabled me to conduct my duties with care and pleasure to myself, and I venture to hope, to your satisfaction.

I have the honor to remain,

Gentlemen,

Your obedient and obliged Servant,

HUGH W. DIAMOND.

REPORT
OF
THE MEDICAL OFFICERS
OF THE
SURREY COUNTY LUNATIC ASYLUM,
1ST JANUARY, 1855.

GENTLEMEN,

We have the honor of laying before you a Statistical Statement of the Medical Department of the Asylum, with the various tables connected therewith, for the past year, 1854.

At the date of our last Report there were 376 male patients, and 495 female patients—together 871. Since then, there have been admitted 161 males, and 168 females—together 329; and 279 have been discharged, or died: leaving, at the close of the year, 921.

The total number of patients in the Asylum, during the year, was 1,200; the highest number at any time was 925, the lowest was 867; and the average number under treatment, during the whole period, was 896.

SURREY COUNTY LUNATIC ASYLUM—1854.

	MALE.	FEMALE.	TOTAL.
Remaining 31st December, 1853.....	376	495	.. 871
Admitted in 1854.....	161	168	.. 329
	<hr/>	<hr/>	<hr/>
	537	663	.. 1200

Of whom have been discharged—

Recovered	67	75	.. 142
Removed, not recovered }	15	19	.. 34
Died	59	44	.. 103
	<hr/>	<hr/>	<hr/>
	141	138	.. 279
	<hr/>	<hr/>	<hr/>
	396	525	.. 921
	<hr/>	<hr/>	<hr/>

The number of recoveries is less than in the preceding year, being in the proportion of about 12 per cent.

That of the deaths is also less, being about $8\frac{1}{2}$ per cent.

Of the deaths of 59 male patients—

18 died of General Paralysis.

8 „ Apoplexy.

3 „ Epilepsy.

7 „ Pulmonary disease.

1 „ Disease of the heart.

7 „ Diarrhoea and Dysentery.

1 „ Decay of nature.

14 „ Exhaustion and various causes.

Of the 44 female patients—

12	died of	Paralysis.
4	„	Epilepsy.
2	„	Pulmonary disease.
2	„	Disease of the heart.
2	„	Diarrhæa.
2	„	Erysipelas.
5	„	Old Age.
15	„	Exhaustion and various causes.

Eight cases came under the investigation of the Coroner and a Jury, whose verdicts were as follows :—

In one case, a male, “ Natural death—Apoplexy.”

In one case, a male, “ That the deceased died from scalds, arising upon his being placed in a hot-water bath, in the temporary absence of the attendant; we, the Jury, do not consider the fact of such absence amounts to an act of criminal neglect on the part of the attendant.”

In one case, a male, “ Natural death.”

In two cases, males, “ Natural death—Epileptic fit.”

In one case, a female, “ Natural death from an epileptic fit.”

In one case, a female, “ Natural death from disease of the heart.”

In one case, a female, “ Natural death.”

We have the honor to be,

Gentlemen,

Your obedient servants,

ALEXANDER MORISON,

CHARLES SNAPE,

HUGH W. DIAMOND.

R E P O R T
OF
THE REV. RICHARD W. GREAVES,
CHAPLAIN
OF THE
SURREY LUNATIC ASYLUM.

TOOTING, FEB. 5, 1855.

GENTLEMEN,

The period during which I have filled the office of Chaplain to the Surrey County Lunatic Asylum having been brief, any observations which I may venture upon, must, of necessity, proceed from a limited experience, and consequently will have less weight than might otherwise attach to them.

I have looked through the Reports of those Gentlemen who have successively filled so worthily the office of Chaplain, and find my own mind prepared already to adopt the views which they have expressed.

The Services, so far as my experience goes, has been well attended, especially on Sundays ; and the congregation, considering the malady wherewith most who compose it, are affected, has been remarkably orderly and attentive.

I have endeavoured to adapt my addresses to the capacities of my hearers, and to their peculiar circumstances ; and, if I may judge from spontaneous observations which have reached me when subsequently visiting in the wards, they have been in many cases understood. It is clear, that amongst the patients there are many who are susceptible of religious instruction and comfort, whilst some are in a decided manner under the influence of the gospel. To a large proportion religious truth is calculated to prove eminently beneficial.

The arrangements of the Establishment are so complete, that the duties of the Chaplain are rendered not only easy, but agreeable. A kind and ready assistance is afforded by all the Resident Officers in the several departments committed to them, and there exists an evident disposition to facilitate the access of the Chaplain to all those patients whose condition

offers even a faint hope of benefit from his ministrations.

In conclusion, I would venture to express a hope, that in each succeeding year, and by whomsoever conducted, an increasing blessing may attend the efforts which are made for gathering the afflicted inmates of your Institution into the fold of Christ.

I am, Gentlemen,

Your very obedient servant,

RICHARD W. GREAVES.

To the Visiting Justices of the
Surrey County Lunatic Asylum.

TABLES.

[TABLE, No. 1.]

STATEMENT of Receipts and Payments in the year

RECEIPTS.

1854.	£	s.	d.	£	s.	d.

The following observations will explain the medical terms used in *Tables Nos. 12 & 13*.

The phenomena of insanity may be comprehended under three heads, those of Unreasonable Conduct, Incoherent Discourse, and Erroneous Ideas or Delusions. These have been again divided into two classes, one including the symptoms of a deranged, the other those of a weak mind, constituting the Lunacy and Idiocy of legal writers.

Derangement of mind may be either general, affecting the different manifestations of mind, including attention, memory, imagination, judgment, and the affections and propensities; or it may be partial, affecting only some of them. The term Mania is applied to general insanity, and that of Monomania to partial insanity.

Weakness of mind may, in like manner be general, or it may be partial; it may also be congenital, that is, from infancy. It is, when general, termed Idiocy, and the term Imbecility has been applied to slighter degrees of weakness of mind when congenital.

Weakness of mind, however, is not always from birth; it frequently occurs after the full possession of the mental faculties, and then the term Dementia, or Fatuity, is employed to distinguish this state, which is analagous to Idiocy; and the term Incipient Dementia is used to mark the lesser degree of weak mind, analagous to Imbecility, and modified by the previous circumstances of the patient. This last-mentioned state in its various stages is very common in Asylums, where we often find the original character of the mental disorder more or less blended with weakness of memory, and incoherence of ideas. It also usually accompanies palsy and epilepsy, and is frequently the state of mind in old age.

In most cases of Mania the ideas are erroneous. Occasionally the unreasonable conduct of the insane person is not attended with this feature, but appears to be the effect of strong propensities overcoming the power of reason and of will. The term Mania, without Delirium, has been applied to this variety, which is not of frequent occurrence.

ALEXANDER MORISON, M.D.
